AI Analysis - Category Breakdown

Meta-model & Relationships

Score: 27/30

Issues Found:

- Relationship Validity: Some relationships lack explicit names, which can reduce clarity. (3 instances)

Scenario Interpretation & Completeness

Score: 18/20

Cross-layer Alignment

Score: 13/15

Issues Found:

- Cross-layer Traceability: Some cross-layer relationships are not clearly depicted. (1 instances)

Viewpoints & Stakeholder Relevance

Score: 23/25

SebTreb Visual Clarity

Score: 7/10

Issues Found:

- Element Alignment: Some elements are not properly aligned, affecting visual clarity. (1 instances)
- Connector Routing: Connectors cross each other, reducing readability. (1 instances)

Manual Assessment Scores

Category	Sub-Category	Rating	Score
Meta-model & Relationships	Correct use of ArchiMate elements	Outstanding	10.0
Meta-model & Relationships	Valid relationships	Good	7.5
Ø=Ü¬ Some concepts missing relationships (e.g. Logical Component View)			
Meta-model & Relationships	Layer correctness	Good	7.5
Ø=Ü¬ Cross-layer not entirely useful/clear/correct			
Scenario Interpretation & Completeness	Coverage of case study requirements	Good	7.5
Ø=Ü¬ Context and Conceptual start to describe scenario but only partially. 6 out of 6 views provided.			
Scenario Interpretation & Completeness	Accuracy of interpretation	Good	7.5
Ø=Ü¬ Good. Unsure how easy it would be to build a deployment from deployment view.			
Viewpoints & Stakeholder Relevance	Appropriate viewpoint selection	Outstanding	15.0
Ø=Ü¬ Good choice of views.			
Viewpoints & Stakeholder Relevance	Stakeholder alignment	Adequate	5.0
Ø=Ü¬ Design aligns with addressing stakeholder needs (requirements). Needs refinement to fully align.			
Cross-layer Alignment	Vertical traceability	Adequate	2.5
Ø=Ü¬ 3 layers are strategy, business and Application. Could be expanded to link business services to application service and how they align to the strategy (value stream shown). How exactly is data quality improved? Which application service aligns to that?			
Cross-layer Alignment	Horizontal alignment	Good	3.8
Ø=Ü¬ 3 layers and correctly aligned horizontally.			
Cross-layer Alignment	End-to-end clarity	Poor	1.3
Ø=Ü¬ Overall cross-layer alignment doesn't provide enough clarity on business alignment to strategy and how that is realised (Application Layer)			
SebTreb Visual Clarity	Layout and organization	Good	3.8
Ø=Ü¬ General layout is fine.			
SebTreb Visual Clarity	SebTreb rules compliance	Poor	1.3
Ø=Ü¬ elm-001 on Cross Layer and Logical Component View elm-002 on Deployment view elm-003 on Logical Data Model box view elm-006 on Cross-layer view elm-009 on Service Conceptual view cnn-001 on most views cnn-002 on Cross-Layer View cnn-005 on Logical Data Model View			

cnn-006 on Logical Data Model View
cnn-012 on some views
cnn-013 on some views
